## Series Editors

- Paul Erdkamp, Vrije Universiteit Brussel, Brussels, Belgium  
Kenneth Hirth, Pennsylvania State University, University Park, PA, USA  
Claire Holleran, University of Exeter, Exeter, Devon, UK  
Michael Jursa, University of Vienna, Vienna, Austria  
Jaehwan Lee, Department of History, Chung-Ang University,  
Heukseok-ro, Korea (Republic of)  
William Guanglin Liu, Lingnan University, Tuen Mun, Hong Kong  
J. G. Manning, Yale University, New Haven, CT, USA  
Himanshu Prabha Ray, Gurugram, Haryana, India

This series provides a unique dedicated forum for ancient economic historians to publish studies that make use of current theories, models, concepts, and approaches drawn from the social sciences and the discipline of economics, as well as studies that use an explicitly comparative methodology. Such theoretical and comparative approaches to the ancient economy promotes the incorporation of the ancient world into studies of economic history more broadly, ending the tradition of viewing antiquity as something separate or ‘other’.

The series not only focuses on the ancient Mediterranean world, but also includes studies of ancient China, India, and the Americas pre-1500. This encourages scholars working in different regions and cultures to explore connections and comparisons between economic systems and processes, opening up dialogue and encouraging new approaches to ancient economies.

## NOTES ON CONTRIBUTORS

**Manu Dal Borgo** was a British Academy Postdoc in Classics and Economics at the University of Cambridge and is currently a director of studies in Classics for St. John's College, Cambridge. She was made a lecturer (teaching) in game theory for the Department of Arts and Sciences at University College London. Her research specializes in economic history, game theory and new machine learning techniques for the study of classics and competition.

**Kim Bowes** is Professor of Classical Studies at the University of Pennsylvania. Her research explores the archaeology and material culture of the Roman and post-Roman worlds, with an increasing focus on historical economies. She directed the Roman Peasant Project, 2009–2015, recently published as *The Roman Peasant Project 2009–2015: Excavating the Roman Rural Poor* (2020) and is currently working on a book on Roman poor economics.

**Colin P. Elliott** is Associate Professor of History at Indiana University where he researches and teaches on economic, social and ecological connectivity in the ancient world. He is currently completing a book on the Antonine Plague (A.D. 165–190) entitled *Pox Romana: The Antonine Plague and the End of the Roman Peace* (under contract, Princeton). His first book, *Economic Theory and the Roman Monetary Economy* (2020, Cambridge), investigated heuristic approaches for using economic theory to understand money and value in the Roman Empire.

**David Singh Grewal** is Professor of Law at the University of California-Berkeley, where he teaches in the Jurisprudence and Social Policy Program. His research interests include political and legal theory, law and political economy, the history of economic thought, and international economic law.

**Sven Günther** is Professor of Classics and vice-director of the Institute for the History of Ancient Civilizations (IHAC), Northeast Normal University, Changchun, People's Republic of China. His research focuses on the socio-economic history of the Greco-Roman world, numismatics, epigraphy, and reception studies. He is executive editor in chief of the *Journal of Ancient Civilizations* (JAC) and co-editor of the *Marburger Beiträge zur Antiken Handels-, Wirtschafts- und Sozialgeschichte* (MBAH).

**Paul V. Kelly** is a retired consulting actuary who advised companies, funds and governments on pension and investment issues across the world; he also represented the European actuarial profession on a statutory EU body, the OPSG. Since retiring he has recently completed his Ph.D. at King's College London on *Risk and Return in Roman Egypt*.

**Max Koedijk** has recently completed his Ph.D. at the Ruhr-Universität Bochum, focusing on the exchange of property in the late Roman Republic. His research interests include real estate markets, incentive- and information structures and the potential application of evolutionary models of behaviour to the ancient world, with a particular interest in status-seeking behaviour.

**Myles Lavan** is Reader in Ancient History at the University of St. Andrews. He works on citizenship, slavery and imperialism in the Roman empire and on the development of quantitative methods in ancient history. He is the co-editor of two forthcoming collections, *The Uncertain Past: Probability in Ancient History* and *Roman and Local Citizenship in the Long Second Century*.

**Michael Leese** is Assistant Professor of History at the University of New Hampshire. An economic and legal historian of ancient Greece, he has published on dowry, economic rationality, economic growth, and family law and is the author of *Making Money in Ancient Athens* (2021).

**Neville Morley** is Professor of Classics and Ancient History at the University of Exeter. His research engages both with the economic and

social history of classical antiquity and the reception and influence of ancient ideas and examples in the modern world.

**Thomas Piketty** is Professor of Economics at the École des hautes études en sciences sociales, and the author of *Capital in the Twenty-First Century* and *Capital and Ideology*.

**Dorothea Rohde** is Lecturer in Ancient History at Bielefeld University. Her research interests include the social, economic and religious history of the Greek and Roman world. She is currently co-editing a book on *Not Paying Taxes. Tax Evasion, Tax Avoidance and Tax Resistance in Historical Perspective*, and writing a cultural history of *The Ancient City* and an analysis of the social impact of poverty and inequality on different ancient societies.

**Cristina Rosillo-López** is Associate Professor in Ancient History at the University Pablo de Olavide de Sevilla. Her research focuses on politics and political culture of the Late Roman Republic, including corruption, rumours, gossip, public opinion and popular political culture. She has also worked on socio-economic issues in the Roman world, such as information asymmetry, real estate and homelessness, and has recently co-edited (with M. García Morcillo) *Managing Information in the Roman Economy*, 2021.

**Walter Scheidel** is Dickason Professor in the Humanities and Professor of Classics and History at Stanford University. His research ranges from ancient social and economic history and pre-modern historical demography to the comparative and transdisciplinary world history of inequality, state formation and human welfare.

**John Weisweiler** is University Lecturer in Ancient History at the University of Cambridge. His main research interest is in Roman and Late Roman social history. He is currently finishing a monograph on the Roman senatorial élite from the early empire until late antiquity. He is also editing a volume on the implications of the work of the anthropologist David Graeber for ancient historians.

**Arjan Zuiderhoek** is Associate Professor of Ancient History at Ghent University. He specializes in ancient urban social, political and economic history. Recent publications include *The Ancient City* (Cambridge University Press, 2017), *Capital, Investment, and Innovation in the Roman World* (co-edited with Paul Erdkamp and Koenraad Verboven;

Oxford University Press, 2020) and *Benefactors and the Polis: The Public Gift in the Greek Cities from the Homeric World to Late Antiquity* (co-edited with Marc Domingo Gygax; Cambridge University Press, 2021).

# LIST OF FIGURES

## Chapter 3

Fig. 1	Athens' male citizen population	58
Fig. 2	Athens' military revenue/expenditure streams from 435 to 404	73
Fig. 3	Free-rider matrix	81
Fig. 4	Prisoner's dilemma matrix	84

## Chapter 8

Fig. 1	Piketty's estimates for the evolution of the capital:income ratio in France, Britain and the United States	213
Fig. 2	Installation date of multi-press oil and wine facilities in the Iberian Peninsula and chronology of all presses in use (data from Marzano 2013, Fig. 5.6, 122)	218
Fig. 3	Wealth inequality in Europe 1810–2010	220
Fig. 4	Chronological distribution of ultra-large fortunes 1–200 CE	228

## Chapter 9

Fig. 1	Known payees from Augustus' spoils of war after actium	252
Fig. 2	Monetary flows in the post-actium italian land market	255

## Chapter 10

Fig. 1	House prices	270
--------	--------------	-----

Fig. 2	Landlord income	271
Fig. 3	<i>SB XVIII 132877</i> —Stochastic return distribution—1000 simulations	272
Fig. 4	All land leases—Stochastic return distribution—105,000 simulations	273
Fig. 5	Land leasing—Stochastic return distribution	273
Fig. 6	Stochastic return distributions	275
Fig. 7	Lower, median and upper bound private wheat prices to AD 270	280
