

Frontiers in Economic History

Series Editors

Claude Diebolt, Faculty of Economics, BETA, CNRS, University of Strasbourg,
Strasbourg, France

Michael Hauptert, University of Wisconsin–La Crosse, La Crosse, WI, USA

Economic historians have contributed to the development of economics in a variety of ways, combining theory with quantitative methods, constructing new databases, promoting interdisciplinary approaches to historical topics, and using history as a lens to examine the long-term development of the economy. *Frontiers in Economic History* publishes manuscripts that push the frontiers of research in economic history in order to better explain past economic experiences and to understand how, why and when economic change occurs. Books in this series will highlight the value of economic history in shedding light on the ways in which economic factors influence growth as well as social and political developments. This series aims to establish a new standard of quality in the field while offering a global discussion forum toward a unified approach in the social sciences.
