Introduction	1
<i>Apostolos Delis</i>	

PART 1

Maritime Labour

- 1 The Impact of Mechanisation on Spanish Maritime Labour (1834–1914):
From Seamen to Sea Workers 15
Enric García-Domingo
- 2 The Evolution of Maritime Labour in Italy in the Age of Transition:
1880–1920 41
Luca Lo Basso
- 3 Aspects of Maritime Labour and Employment in the Greek Sailing and
Steam-Powered Fleet, 1840–1914 68
Alkiviadis Kapokakis
- 4 Between Maritime Labour and Social Security in the Kingdom of Italy
*The Cassa degli invalidi della marina mercantile of Genova in the Age of
Transition (1861–94)* 104
Andrea Zappia
- 5 Dock Workers and Employers in Loading and Unloading in the Port of
Barcelona after the End of the Guild System, 1850–90 125
Jordi Ibarz
- 6 Associationism and Labour Conflicts in Fishing in Eastern Spain during
the Transition from Sail to Motor (1864–1923) 151
Daniel Muntané

PART 2

Maritime Communities

- 7 The Metamorphosis of Barceloneta: The Effects of Industrialisation and Liberalism on the Maritime District of Barcelona 175
Eduard Page Campos
- 8 The Port of La Ciotat and Its Maritime Community towards Industrialisation (1836–1916) 204
Kalliopi Vasilaki
- 9 Camogli as a Maritime Community in the Age of Transition (1850s–1914) 230
Leonardo Scavino
- 10 From Traditional Maritime Communities to Maritime Centres. Urbanization, Social Hierarchies and the Labour Market in the Age of Steam
The Case Study of Galaxidi, 1850s–1910s 264
Katerina Galani
- 11 The Ottoman Port of Chania during the Transition from Sail to Steam 293
Petros Kastrinakis

PART 3

Shipping

SECTION 1

Cargo Shipping

- 12 Ship Operation in Transition: Greek Cargo Sailing Ships and Steamers, 1860s–1910s 321
Apostolos Delis
- 13 Navigating in the Age of Transition: A Voyage Analysis of Greek Sailing Ships and Steamers 1860s–1920s 362
Apostolos Delis

SECTION 2

Passenger Shipping

- 14 Modernizing Seaborne Communication in Nineteenth-Century Greece
*The Role and the Contribution of the Hellenic Steam Navigation
Company, 1857–93* 415
Apostolos Delis
- 15 Steamers for the Empire: Austrian Lloyd and the Transition from Sail to
Steam in the Austrian Merchant Marine (1836–1914) 447
Matteo Barbano
- 16 The Russian Steam Navigation and Trading Company: The Transition
from Sail to Steam in the Russian Black Sea (1856–1914) 478
Anna Sydorenko

PART 4

Informatics, Semantic Networks and History

- 17 Building and Exploring a Semantic Network of Maritime
History Data 509
*Pavlos Fafalios, Georgios Samaritakis, Kostas Petrakis, Korina Doerr,
Athina Kritsotaki, Anastasia Axaridou and Martin Doerr*
- Conclusions 536
Apostolos Delis
- Bibliography 543
- Index 591

- 9789004514195

Acknowledgements

This collective volume represents an important part of the results of the ERC STG 2016 project entitled “*Seafaring Lives in Transition, Mediterranean Maritime Labour and Shipping, 1850s–1920s (SeaLiT)*”, hosted by the Institute for Mediterranean Studies/FORTH and in partnership with the University of Barcelona, the University of Genoa, and the Centre of Cultural Informatics of the Institute for Computer Sciences/FORTH. The project with Apostolos Delis of the Centre for Maritime History of the IMS/FORTH as Principal Investigator, involved scholars and researchers of various ranks, professors, researchers, post-doc researchers, PhD students, and MA and BA students from Greece, Italy, Spain, France, and Ukraine. The collaboration of the Principal Investigator with the heads of the individual groups, Prof. Jordi Ibarz of the University of Barcelona, Prof. Luca Lo Basso of the University of Genoa, and Dr. Martin Doerr and Dr. Pavlos Fafalios of the Centre of Cultural Informatics, produced fruitful results, which, among other their activities, also appear in the chapters of this book. Furthermore, Dr. Enric Garcia Domingo, current Director of the Maritime Museum of Barcelona, was also instrumental in the hosting of the Second Workshop of the SeaLiT project in June 2018.

For the completion of this book a number of research assistants, PhD, MA, and BA students, have worked on the insertion and the processing of data from the various types of sources in the databases, from 2017 up to now. At the IMS/FORTH centre, Thomas Kalesios, a PhD student of the University of Crete, has greatly contributed to the very demanding task of the insertion and processing of the data from ship logbooks onto a specially-built database and a virtual map created by the CCI/ICS/FORTH under the assistance of Kostas Petrakis. Furthermore, in the same group of IMS/FORTH assistants, the BA, MA, and PhD students of the University of Crete, Nikos Kastrinakis, Aspasia Chalkiadaki, Mikaela Stavrakaki, Kostas Fradellos, and Thanos Aggelopoulos have worked thoroughly on the insertion and processing of the data from different types of archives, like demographic sources (censuses, etc), seafarer’s registries, crew lists, payrolls and accounting books, and papers of shipping companies. In the research assistant group of the University of Genoa, the BA and MA students Beatrice Corradi, Benedetta Risso, Carolina Gaggero, Francesco Ferrando, Giacomo Calcagno, Massimo Ponasso, Maki Asai, and Maurizio Antinori, have also worked on the insertion of data from Ligurian crew lists and maritime workers registers. In the University of Barcelona group, the PhD student Daniel Muntané and Clàudia Mateo have worked on a variety

of sources, from sailors' registers and crew lists, to logbooks and ship registries. Miguel Pérez de Perceval, Professor at the University of Murcia, was an invaluable help for the work with the sources of the Naval Archive of Cartagena, and also Arturo Pérez, who was in charge of the digitization of the muster rolls in said archive. Rosa Busquets, librarian at the Museu Marítim de Barcelona, gave the Barcelona team a helping hand as well.

Research across the various archives and libraries was largely facilitated by the assistance of people either in the capacity of personnel or as experts in the sought sources. First, the Director Eirini Dambasi and the personnel of the Kaireios Library of Andros, provided all available means for the digitization of its enormous maritime archives. There is also Lilia Bilousova, former Deputy Director of the State Archive of the Odessa Region, in Odessa, and Ludmila Bondarenko, Director of the Odessa Maritime Museum, who both provided great support for the research of Dr. Anna Sydorenko. Furthermore, Dr. Matteo Barbano was helped in particular by the personnel of the Civico Museo del Mare of Trieste, and especially by Claudio Raini, and also by Andrea Bonetta and Fabio Gallo of the shipping company *Italia Marittima* (formerly *Lloyd Triestino*). In addition, marine engineer and maritime historian Maurizio Eliseo gave us crucial support and help by locating useful archival material and by providing accessing to his private archive in Trieste. *Association Joseph Edouard Vence*, the *Musée Ciotaden*, and the Municipal Archives of La Ciotat provided valuable assistance in locating very useful archival material for the research of Kalliopi Vasilaki. Minas Antypas, a PhD student at the University of Crete, was very kind in taking the initiative to digitize and send us the invaluable archives of a nineteenth century shipping firm in Hydra, such as logbooks and account books from a private collection. We must also thank the staff of the General Archive of the Navy of the *Viso del Marqués*, and especially those of the Naval Archive of Cartagena for their help in the different research campaigns that the Barcelona team carried out in these institutions. José Fernando Escalas Porcel, the Maritime Authority Captain at Palma de Mallorca offered his generous collaboration and free access to the sources kept under his custody. Last, but not least, was the work of the Director of the IMS/FORTH, Prof. Gelina Harlaftis, who contributed to the improvement of many chapters in the present book, and provided continuous support to the activities and to the members of the project over all these years.

Figures, Maps, Charts and Tables

Figures

- 1.1 Catalan *laud* loading cargo 23
- 1.2 The barque *Habana* 24
- 1.3 The passenger steamship *Reina Victoria Eugenia* 27
- 3.1 Greek sailor in traditional dress, 1844 (unknown author) 74
- 3.2 Engine crew of the cargo steamer *Michail* owned by Stamatios G. Embiricos from Andros, probably Italy, 1899 92
- 6.1 Pair sail trawling 154
- 7.1 The walled city of Barcelona and the district of Barceloneta (bottom right) in 1808 177
- 7.2 Several sailing ships anchored in the port of Barcelona in 1856. The only exit of the port, by Barceloneta (centre right), intrinsically connected to the only two docks. The walled city, with its industrial chimneys, is in the background 183
- 7.3 The port of Barcelona in 1882–83, when the first steps in its reform had already been carried out. The new quays and dikes and the demolition of the city's walls had moved the epicentre of the port westward 192
- 8.1 Emile Loubon, *Le port de La Ciutat* (1841) 229
- 9.1 The sailing ship *Fortunato Figari* of Camogli in Melbourne, 1909 254
- 9.2 Captains of Camogli celebrating, 1895 260
- 11.1 Aspect of the port of Chania with sailing ships between 1886 to 1901 300
- 11.2 View of the port of Chania from the Venetian Arsenal, 1919 304
- 14.1 The steamship *Panellinion* and her officers 433
- 14.2 The steamship *Omonoia* in the port of Syros, in front of the custom house (unknown date) 439
- 14.3 Steamships under repair in the Arsenal of Syros, 1904 446
- 15.1 Postcard depicting the Austrian Lloyd steamer the *Leopolis* docked in Trieste (c.1910) 470
- 15.2 Celebrations for the laying of the foundation stone of Austrian Lloyd's shipyard (30 May 1853) 473
- 16.1 The port of Odessa. Postcard, late nineteenth century 481
- 17.1 The home page of FAST CAT 512
- 17.2 An example of a FAST CAT record belonging to the template "Logbook" 513
- 17.3 An example of a nested table in FAST CAT 514
- 17.4 The home page of FAST CAT TEAM 515
- 17.5 Management of vocabularies in FAST CAT TEAM 516

- 17.6 Inspecting the terms of a vocabulary in FAST CAT TEAM 516
- 17.7 Inspecting the FAST CAT records in which a vocabulary term appears 517
- 17.8 Curation of "Person" instances in FAST CAT TEAM 518
- 17.9 Curation of "Location" instances in FAST CAT TEAM 518
- 17.10 The main concepts of the SeaLiT Ontology 521
- 17.11 Modelling information about a ship 521
- 17.12 Activities related to a ship 522
- 17.13 Modelling information about a ship voyage 522
- 17.14 Activities related to a ship voyage 523
- 17.15 Modelling information about a crew payment 524
- 17.16 Modelling information about a person 524
- 17.17 The home page of 3M editor 525
- 17.18 A part of a mapping definition in 3M editor for the template crew list (*Ruoli di Equipaggio*) 526
- 17.19 A small part of the derived semantic network 526
- 17.20 Browsing the main entities that appear in the transcribed and curated data in ResearchSpace 528
- 17.21 Browsing the data of a ship voyage in ResearchSpace 529
- 17.22 Inspecting the places connected to a ship voyage on a map in ResearchSpace 530
- 17.23 An example of how the user can build a semantic search query in ResearchSpace 531
- 17.24 Selecting an area of interest directly on the map in ResearchSpace 531
- 17.25 An example of a semantic search query and its results in ResearchSpace 532
- 17.26 Inspecting a bar chart of the results in ResearchSpace by selecting a particular visualization context 533
- 17.27 Visualizing the results on a map in ResearchSpace 533
- 17.28 Filtering the displayed results based on an entity property in ResearchSpace 534
- 17.29 Inspecting the values of the filter "had location of residence" in ResearchSpace 534

Maps

- 1.1 Mediterranean ports and naval department of Cartagena (shaded area) 26
- 3.1 Origins of seafarers, 1879: selected ports 72
- 4.1 The Ligurian area of competence of the *Cassa degli invalidi della marina mercantile* of Genova 112

- 5.1 Port of Barcelona, 1861 133
- 5.2 Port of Barcelona, 1874 139
- 6.1 Administrative division of the Spanish coast (1908): maritime departments and provinces 153
- 7.1 Places of origin of the population, 1840–1900 (%) 188
- 8.1 Map of La Ciotat, 1800 215
- 8.2 Map of La Ciotat, 1891 216
- 9.1 Camogli within the Ligurian maritime region 233
- 9.2 Loading ports of Camogli's fleet (1785) 234
- 9.3 Arrivals of Camogli ships to the Black Sea ports (1853–1865) 237
- 9.4 Camogli's discharging ports of Black Sea cargoes (1853–1865) 239
- 9.5 Camogli's ships in ports for loading operations (1881–1914) 245
- 9.6 Camogli's ships in ports for discharging operations (1881–1914) 246
- 9.7 Places of construction of Camogli's fleet (1853–1865) 250
- 9.8 Birthplace of crew members on board Camogli-owned ships (1853–1865):
Liguria 255
- 10.1 Galaxidi 270
- 11.1 Ottoman map of the western part of Crete in the nineteenth century 309
- 12.1a Routes of the steamer *Thiresia*, 1888–1890 339
- 12.1b Routes of the steamer *Leonidas*, 1904–1906 339
- 12.2a Routes of the steamer *L.G. Goulandris* 1902–1915 340
- 12.2b Routes of the steamer *G.M. Embiricos* 1908–1916 340
- 13.1 Routes of the brig *Coundouriotis* 1866–1874 366
- 13.2 Routes of the brig *Eleni Koupa* 1878–1888 366
- 13.3 Routes of the brig *Asimoula* 1882–1885 367
- 13.4 Routes of the brig *Stratigos Favieros* 1876–1889 368
- 13.5 Loading ports in West Africa of the brig *Stratigos Favieros* 369
- 13.6 Voyages of the brig *Theofania* 1873–1876 370
- 13.7 Routes of the steamer the *Thiresia*, 1888–1890 371
- 13.8 Routes of the steamer the *Leonidas* 1904–1906 372
- 13.9 Routes of the steamer the *Andriana* 1908–1909 372
- 13.10 Routes of the steamer *Konstantinos Lemos* 1924–1927 373
- 13.11 Crossing the Dardanelles 383
- 13.12 Sea of Marmara anchoring and passing points 384
- 13.13 Navigating the Black Sea 385
- 13.14 The *Eleni Koupa*: Marseille-Berdyansk-9 March 1886–22 April 1886 386
- 13.15 The *Stratigos Favieros*: Torre Annunziata-Yeysk 21 February 1885–11 April 1885;
the *Coundouriotis*: Istanbul-Berdyansk 13 September 1867–7 October 1867

- (highlighted); and the *Asimoula*: Istanbul-Berdyansk 2 April 1885–13 April 1885 in the centre of the map 387
- 13.16 The *Asimoula*: Istanbul-Batum 12 May 1883–22 May 1883; the *Coundouriotis*: Foça-Surmene 5 February 1869–2 March 1869 (highlighted) 388
- 13.17 The *Coundouriotis*: Berdyansk-Marseille 19 September 1873–30 October 1873; the *Stratigos Favieros*: Yeysk-Barcelona 30 April 1885–2 July 1885 (highlighted) 389
- 13.18 The *Asimoula*: Batoum-Istanbul 8 July 1883–23 July 1883 (highlighted); and the *Coundouriotis*: Surmene-Yevpatoria 3 April 1869–8 April 1869 390
- 13.19 Typical summer/winter routes. The *Coundouriotis* summer route: Berdyansk-Marseille 14 June 1872–4 August 1872 (highlighted); the *Eleni Koupa* winter route: Berdyansk-Marseille 20 October 1879–14 December 1879 391
- 13.20 Alternative routes. North of Corsica the *Eleni Koupa*: Berdyansk-Marseille 13 October 1887–28 December 1887; through the Bonifacio Straits (highlighted): Berdyansk-Marseille 9 October 1886/–1 February 1887 392
- 13.21 The *Stratigos Favieros*: Berdyansk-Marseille 18 June 1882–8 August 1882 (highlighted); Burgas-Marseille 23 October 1882–18 December 1882 393
- 13.22 The *Stratigos Favieros*: Marseille-Gorée 3 October 1880–4 November 1880 (highlighted); the *Theofania*: Swansea-Brass River 20 December 1875–13 February 1876 394
- 13.23 Winter homeward route. The *Stratigos Favieros*: Rio Nunez-Marseille 16 December 1880–20 January 1881 (middle); the *Theofania*: Sierra Leone-Marseille 28 December 1873–21 March 1874 (left); highlighted on the right is the pilot's suggested itinerary 395
- 13.24 Summer homeward route. The *Stratigos Favieros*: Rufisque-Marseille 25 April 1881–2 June 1881. Highlighted is the pilot's suggested itinerary, from Labrosse, *The Navigation of the Atlantic*, 64–66, 405 396
- 13.25 Summer homeward route. The *Theofania*, Rio Nunez-Marseille: 21 June 1874–5 September 1874. Highlighted is the pilot's suggested itinerary, from Labrosse, *The Navigation of the Atlantic*, 64–66 397
- 13.26 The *Thiresia*: Galati-Marseille 30 May 1888–9 June 1888; Pomorie-Marseille 7 January 1890–16 January 1890 (highlighted) 398
- 13.27 The *Andriana*: Galati-Rotterdam 22 April 1908–11 May 1908 398
- 13.28 The *Leonidas*: Cardiff-Savona 3 August 1905–12 August 1905; the *Andriana*: Barry-Naples 4 June 1908–14 June 1908 (highlighted); the *Konstantinos*: Rotterdam-Piraeus 11 December 1925–27 December 1925 399
- 13.29 The *Konstantinos*: Penarth-Buenos Aires 6 August 1924–6 October 1924; highlighted the suggested course of sailing vessels bound for the English Channel, from: Labrosse, *The Navigation of the Atlantic*, 85 401
- 15.1 The Austrian Lloyd's regular lines in 1844 462

- 15.2 Main axes of Austrian Lloyd's regular lines in 1909 467
 16.1 The RSNTC lines 488
 16.2 Port-cities and rivers of the southern Russia 496

Charts

- 3.1 Growth of Greek fleet registrations in the ports of Syros, Spetses, Hydra, and Galaxidi, 1840–1874 75
 3.2 Steamship registration ports 1907 net registered tonnage (NRT) 78
 3.3 Growth of Greek registered fleet and employment trends, 1833–1875 80
 3.4 Ratio of men per ton on Greek sailing ships 1834–1874 82
 3.5 Capacity of steamships and sails, 1883–1914 87
 3.6 Seafarers on coastal and seagoing (included steam) ships, 1887–94 89
 3.7 The composition of N.A.T. revenues per category, 1862–1890 98
 3.8 Total proceeds and total spending of N.A.T., 1862–1892 99
 4.1 Trend of the summary accounting of the *Cassa degli invalidi della Marina mercantile* of Genova, 1874–94 119
 5.1 Average gross register tonnage (GRT) of ships entering the port of Barcelona, 1845–1900 129
 5.2 New registrations of *barcazas*, 1850–1910 131
 7.1 Evolution of the population of Barceloneta, 1768–1900 186
 8.1 Shipbuilding production in La Ciotat (in tonnage) during the years 1815–1830 and 1831–1847 210
 8.2 Distribution of the population of La Ciotat according to nationality, 1851–1911 218
 8.3 Urban section and rural section growth in La Ciotat, 1851–1911 219
 8.4 Members of household connected to the shipyards in relation to the total population of the city, 1831–1911 220
 8.5 Total service on board steamships and sailing ships by percentage of the three different samples, given their career period 225
 8.6 Repartition of work in percentage on deck, on the engine crew and engineers given the total careers of sailors on the two last samples 227
 9.1 Camogli's discharging ports for Black Sea cargoes, 1853–1865 239
 9.2 Constructions of Camogli's ships, 1809–1883 249
 9.3 Total tonnage and number of ships owned by Camogli shipowners, 1853–1920 253
 9.4 Birth-place of crew members on board Camogli-owned ships, 1850–1865 256
 9.5 Birth-place by skill-levels 257

- 9.6 Birth-place of crew members on board of Camogli-owned ships, 1885–1905 259
- 10.1 Division of male labour in Galaxidi (N of population = 1315) 272
- 10.2 Ports of register of Galaxidi steamers 278
- 12.1 Syros shipbuilding output/shipping income (in drachmas)/freight rates Odessa-Marseille 327
- 12.2 Net profit of *Tripolina* in drachmas (6 voyages, 1861–1864) and *Eleni Koupa* in francs (17 voyages, 1878–1887) 344
- 12.3a and 12.3b Comparison between percentage of freight rates (in francs) and net profit (in pounds) of the *George M. Embiricos*, 1904–1916 (above) and the *Leonardos G. Goulandris*, 1903–1915 (below) 345
- 12.4 Price per share of dividends (in pounds) of the *George M. Embiricos* (GME), 1908–1916 and the *Leonardos G. Goulandris* (LGG), 1911–1915 347
- 12.5 Course of wages (in French francs for specific ranks on the two steamers *the Leonardos G. Goulandris* (LGG) (1909–1915) and the *Georgios M. Embiricos* (GME)) (1908–1916) 352
- 15.1 Mail traffic by Austrian Lloyd, 1837–1855 454
- 15.2 Austrian Lloyd's annual net profit, 1840–1853 455
- 15.3 Austrian Lloyd's annual net profit, 1855–1913 459
- 15.4 Percentage distribution of the yearly regular navigation income of Austrian Lloyd by geographical area, 1842–1883 461
- 15.5 Austrian Lloyd navigation incomes on regular lines and occasional voyages, 1845–1899 469

- 13.9 Voyage duration of the steamer *Konstantinos* 382
- 13.10 Time spent ashore in sailing ships and steamers 410
- 14.1 The fleet of the Hellenic Steam Navigation Company 430
- 14.2 Traffic of the HSNC fleet, 1857–1881 434
- 14.3 Percentage of category of revenues 435
- 14.4 Percentage of the total revenues of voyages of the HSNC per line, 1857–1881 436
- 14.5 Cost structure of the years 1861–1881 (as a percentage) 441
- 14.6 Coal consumption, 1861–1881 442
- 14.7 Economic performance of the HSNC (in drachmas), 1857–1881 443
- 15.1 Average annual net profits (including state subsidies) and state subsidies, 1855–1910 460
- 15.2 Percentages of the distribution of Austrian Lloyd's traffic in the years 1842, 1847, and 1852 463
- 15.3 Percentages of the distribution of Austrian Lloyd's traffic in the years 1872, 1877, and 1882 465
- 15.4 Percentages of the distribution of Austrian Lloyd's traffic in the years 1892, 1897, and 1902 466
- 16.1 The biggest shareholders of the RSNTC (November 1856) 486

Appendices

- 3.1 Maritime workers 1862–1906 103
- 3.2 Freight rates of wheat, Odessa-England (in shillings) 103
- 10.1 Galaxidi steamers 289
- 16.1 Lines of the Russian Steam Navigation and Trading Company, 1856–1913 503
- 16.2 Income from cargo and passenger activity of the Russian Steam Navigation and trading Company (per line, in rubles) 504

List of Contributors

Anastasia Axaridou

is a R&D engineer at the Centre for Cultural Informatics and at the Information Systems Laboratory of ICS-FORTH, since 2003. She holds a BSc in Physics, University of Crete, and a MSc in Information Systems, Hellenic Open University. Her main interests lie in the area of knowledge representation, linked data, and semantic web technology. She has been a team member in several projects funded by the EU and the Greek government. Her main activity concerns the development of modern applications in the field of digital libraries, archival documentation, and terminology alignment/thesauri mapping, for the research, education, and cultural heritage sectors.

Matteo Barbano

completed his PhD in the Department of Antiquities, Philosophical and Historical Studies (DAFIST) at the University of Genoa in 2016. He is currently a post-doc researcher for the ERC Starting Grant “*Seafaring Lives in Transition. Mediterranean Maritime Labour and Shipping during Globalization, 1850s–1920s* (SeaLiT)”. In this context, his studies switched to the “long nineteenth century”, focusing on the economic, social, cultural, and political aspects of the transition from sail to steam navigation in the Mediterranean, mainly observed through the evolution of the Austrian Lloyd Steam Navigation Company.

Eduard Page Campos

completed his PhD at the Universitat de Barcelona in 2022. He earned an undergraduate degree in history, and he has specialized in late modern history with a master's degree. His interests are focused on the social history of the Industrial Revolution, specifically in the fields of maritime and urban history. His doctoral project studies the transformation of the maritime district of Barcelona, la Barceloneta, during the transition from sail to steam navigation, between 1840 and 1900. The demographic transition, the changes on mobility patterns and on labour markets, and the trajectory of the shipbuilding sector are some of the main topics addressed.

Apostolos Delis

is Researcher and founding member of the Centre of Maritime History in the IMS/FORTH. He is the Principal Investigator of the ERG STG 2016 project “*Seafaring Lives in Transition. Mediterranean Maritime Labour and Shipping, 1850s–1920s* (SeaLiT)” and is author of the monograph *Mediterranean Wooden*

Shipbuilding. Economy, Technology and Institutions in Syros in the Nineteenth Century (Leiden: Brill, 2015). His research interests include the history of the sailing ship and the steamship, the shipbuilding industry, the history of navigation, maritime labour, and maritime economic history.

Katerina Galani

PhD Oxford University (2011), is Post-Doctoral Researcher at the Institute for Mediterranean Studies and teaches economic and social history at the Hellenic Open University. In 2012, she was awarded the Frank Broeze Prize by the International Maritime History Association. Her first monograph, *British Shipping in the Mediterranean During the Napoleonic Wars* was published by Brill in 2017. Her recent work involves looking at the formation of the port-city of Piraeus during industrialization, and the naval and merchant fleet during the Greek War of Independence (1821–31).

Korina Doerr

is a product and systems design engineer at the Centre for Cultural Informatics and at the Information Systems Laboratory of ICS-FORTH, since 2012. She obtained her Engineer's Diploma in 2010 from the Department of Product and Systems Design Engineering of the University of the Aegean (Greece). She has participated in a large number of European and national projects, with the role of designing the interfaces of products and systems, communicating with end-users, as well as designing information structures.

Martin Doerr

is Researcher Emeritus at the Information Systems Laboratory and Honorary Head of the Centre for Cultural Informatics at ICS-FORTH. He has led, or participating in, a series of national and international projects on cultural information systems. His research interests fall within the areas of ontology engineering, conceptual modelling, digital libraries, information integration, and scientific argumentation. His long-standing interdisciplinary work and collaboration with the International Council of Museums, on modelling cultural-historical information, has resulted, among other things, in the ISO Standard 21127:2014, a core ontology for the purpose of schema integration across institutions.

Enric Garcia Domingo

is a researcher interested in maritime history with a broad scope, including maritime labour history, the ship building industry, shipping companies,

maritime culture and heritage, etc. He has a degree in history (Universitat de Barcelona) and a PhD in contemporary history (Universitat de Barcelona). His dissertation topic was labour in the Spanish merchant marine in the transition from sail to steam, between 1834–1914. He has published several books and articles, and has given many papers at national and international meetings. He is currently the Director of the Museu Marítim de Barcelona, and a member of the research group *TIG Treball, Institucions i Gènere* (Labour, Institutions, and Gender) at the Universitat de Barcelona.

Pavlos Fafalios

is a postdoctoral researcher at the Centre for Cultural Informatics and the Information Systems Laboratory of ICS-FORTH, since 2019, currently working as principal investigator on the project “ReKnow” (Marie Skłodowska-Curie Individual Fellowship, ID: 890861). He obtained his Engineer’s Diploma in 2009 from the Department of Information and Communication Systems Engineering of University of the Aegean (Greece), and his MSc and PhD in 2012 and 2016, respectively, were from the Computer Science Department of the University of Crete (Greece). His research interests fall in the areas of information retrieval, the semantic web, knowledge representation, and knowledge engineering. The results of his research have been published in more than 50 peer-reviewed articles.

Jordi Ibarz

is Professor of Modern History at the Department of History and Archaeology of the University of Barcelona, and is a member of the research group “Labour, Institutions, and Gender”. He is coordinator of the Ibero-American Research Network in Maritime Communities (RIICoMa) and co-coordinator of the Maritime Labour Working Group of the European Labour History Network. His main research interests are in labour history, especially the history of dock and glass workers. He has recently published “Labor Mobility and Migrations in the Barcelona Docks, c. 1900–1950”, in *Migrants and the Making of the Urban-Maritime World: Agency and Mobility in Port Cities, c. 1570–1940*, ed. Christina Reimann, Martin Öhman, (New York and Oxon: Routledge 2021).

Alkiviadis Kapokakis

is a PhD candidate in the Department of History and Archaeology at the University of Crete, in co-supervision with the Institute for Mediterranean Studies (IMS/FORTH) in Rethymnon. He has been a PhD Fellow since June 2019 for the ERC STG 2016 project SealIT. He studied contemporary European and

Greek history at the University of Crete (BA 2014; MA 2019). The subject of his master's thesis concerned maritime communities, on the island of Hydra in particular. In his dissertation he focuses on labour relations in shipping and the labour market in Greece from 1850 to 1914.

Petros Kastrinakis

completed her PhD at the History Department of the University of Crete in collaboration with the Institute for Mediterranean Studies (IMS/FORTH) in Rethymnon. He graduated and holds an MA in Ottoman History also from the same department. His main field of research is urban and maritime history, specializing in late Ottoman Crete. His PhD thesis is focused on the port of Ottoman Chania in the nineteenth century, examining the role of local communities (Muslim, Christian, Jewish) in the commercial and shipping activities of the island. He has worked on several research projects at the Institute for Mediterranean Studies (IMS/FORTH) between 2015–21.

Athina Kritsotaki

is a graduate of the Department of Archaeology and Art History of the National and Kapodistrian University of Athens. She holds a MSc in Computer Science. Her scientific interests are focused on knowledge representation, conceptual modelling, thesauri, ontology engineering and development, archaeological theories of prehistory, and argumentation systems and reasoning. She has been working on cultural documentation and development for the Centre of Cultural Informatics in FORTH for over fifteen years.

Luca Lo Basso

is Professor of Modern History at the Department of History of the University of Genoa and head of the *Laboratorio di Storia Marittima e Navale* (NavLab). His main research interests lie in various aspects of the Ligurian maritime history in the Early Modern Period. Recently, as a head of the group of the project SeaLiT in the University of Genoa he published also works on the transition from sail to steam such as his monograph *Dal Vento Al Carbone. Le metamorfosi del lavoro marittimo in Italia nell'età della transizione (1880–1920)*, (Genova: Città del Silenzio 2020).

Kostas Petrakis

is a R&D engineer at the Information Systems Laboratory of ICS-FORTH, Greece. He received his BSc at the Computer Science Department of the University of Crete, Greece in 2011, and his MSc in Graphic Arts and Multimedia at the

Hellenic Open University, Greece in 2016. His MSc focused on ubiquitous computing, IoT, and home automation. He is also interested in web development, the semantic web, conceptual modelling, and knowledge representation. Currently he works on the design, implementation, and development of web applications and services in support of European and Greek projects.

Daniel Muntané

is a PhD student and a member of the research group “*Treball, Institucions i Gènere*” (TIG) at the Universitat de Barcelona where he graduated in History (2016) and specialized in modern history through a master’s degree (2017). His field of study is the fishing sector, and especially fishermen’s associations in eastern Spanish during the transition from the sail to the motor (1864–1923).

Georgios Samaritakis

is an R&D engineer at the Centre for Cultural Informatics and at the Information Systems Laboratory of ICS-FORTH, since 2004. He holds a MSc in Electrical and Computer Engineering, University of Patras. He has taken part in several national and international projects. His main interests lie in the areas of information retrieval and manipulation, web design, the semantic web, knowledge representation, and natural language processing.

Leonardo Scavino

is a Post-Doctoral Fellow at the University of Genoa, and a member of Nav-Lab. He is also a Teaching Assistant of Atlantic History and Maritime History at the University of Genoa. In 2020, he was awarded the European PhD Label at the University of Genoa within the ERC SG project SeaLiT (“*Seafaring Lives in Transition. Mediterranean Maritime Labour and Shipping during Globalization, 1850s–1920s*”), coordinator Apostolos Delis (IMS-FORTH, Crete). His main research interests deal with global and Mediterranean maritime history in the age of transition from sail to steam, maritime labour history, and Atlantic history.

Anna Sydorenko

studied Political Science at the National and Kapodistrian University of Athens. She completed her PhD in the History Department at the Ionian University (2017). She is currently a Post-Doctoral Fellow in the Institute for Mediterranean Studies/FORTH. Her research interests involve port history, the social and economic history of eastern Europe, and the history of the Greek diaspora. She has participated in several research projects on maritime history.

Kalliopi Vasilaki

completed her PhD at the Department of History and Archaeology at the University of Crete in 2022 and has been a PhD Fellow of the ERC STG 2016, SeaLiT project at the Institute of Mediterranean Studies (IMS/FORTH), since July 2017. She holds a master's degree in History (School of Advanced Studies in Social Sciences/École des hautes études en sciences sociales, Paris, 2012), and a bachelor degree in History and Archaeology (University of Crete, 2010). Her research focuses on the study of the maritime communities in the French Mediterranean, in particular in the port of La Ciotat, during the transition from sail to steam shipping.

Andrea Zappia

PhD, is a Teaching Assistant in Modern History at the University of Genoa. He participated in the ERC project “*Seafaring Lives in Transition. Mediterranean Maritime Labour and Shipping During Globalization, 1850s–1920s*” (SeaLiT) dealing with social security in Genoa in the second half of the nineteenth century. The author of two monographs (*Mercanti di uomini* (Città del Silenzio, 2018), and *Il miraggio del Levante* (Carocci, forthcoming)), his interests mainly focus on maritime and Mediterranean history between the seventeenth and nineteenth centuries, with a particular focus on North African society, Jewish communities, the phenomena of privateering, captivity, and consular and missionary activity.
