# Atoms, Corpuscles and Minima in the Renaissance

*Edited by*

Christoph Lüthy  
Elena Nicoli

BRILL

LEIDEN | BOSTON

This book is the result of a project entitled “Mysteries of Living Corpuscles: The Humanist Revival of Presocratic Philosophy and Atomism in Philosophy, Science and Medicine” of the Dutch Research Council (NWO), no. 360-20-320. Extra financing for the research that went into producing this volume was offered by the Faculty of Philosophy, Theology, and Religious Studies of Radboud University, Nijmegen.

Cover illustration: Giordano Bruno, *De triplici minimo et mensura* (Frankfurt, 1591), 50: “Area Democriti” (also included in the chapter by Leen Spruit).

The Library of Congress Cataloging-in-Publication Data is available online at <https://catalog.loc.gov>

## Notes on Contributors

### *Stephen Clucas*

is Reader in Early Modern Intellectual History at Birkbeck, University of London. He has published widely in the history of early modern philosophy and science, including a number of articles specifically devoted to the history of corpuscular matter theory. He is currently co-editing Thomas Hobbes' *De corpore* (with Timothy J. Raylor) for the Clarendon edition of the Works of Thomas Hobbes.

### *Christoph Lüthy*

is Professor in the History of Philosophy and Science at Radboud University, Nijmegen (The Netherlands). He has published extensively on the history of matter theories and such neo-atomists as Giordano Bruno, David Gorlaeus, Sébastien Basson and Daniel Sennert, as well as on the evolution of scientific (or 'epistemic') imagery. He is also general editor of the journal *Early Science and Medicine*.

### *Craig Martin*

(PhD 2002) is associate professor of the History of Science and Technology at Ca' Foscari University, Venice. He researches the history of early modern medicine and natural philosophy, with special attention given to Aristotelianism and the history of meteorology. His most recent book is a translation of Girolamo Mercuriale's *On Pestilence* (University of Pennsylvania Press, 2022).

### *Elisabeth Moreau*

is an FNRS postdoctoral researcher at the Université libre de Bruxelles (Brussels, Belgium). Trained in history and philosophy of science, she has worked on medicine and matter theories in late Renaissance Europe. Her current postdoctoral project, "From the Alembic to the Stomach," is centred on the medical and alchemical conceptions of digestion and metabolism.

### *William R. Newman*

is professor in the Department of History and Philosophy of Science and Medicine at Indiana University. His numerous publications on premodern natural philosophy, matter theory, and alchemy include *Promethean Ambitions* (Chicago, 2004), *Atoms and Alchemy* (Chicago, 2006), and *Newton the Alchemist* (Princeton, 2019), as well as other monographs, edited volumes, and articles. He is also general editor of the online *Chymistry of Isaac Newton* project ([www.chymistry.org](http://www.chymistry.org)).

*Elena Nicoli*

(PhD 2017) is associate researcher at the Center for the History of Philosophy and Science at Radboud University, Nijmegen (The Netherlands). Her research interests concern the reception of Epicureanism and Lucretius, especially in the Renaissance. She has published articles on the Renaissance commentaries on *De rerum natura* and the influence of Lucretius on philosophers such as Marsilio Ficino and Giordano Bruno.

*Sandra Plastina*

is associate professor in the History of Philosophy at University of Calabria (Italy). Her research interests focus on the Renaissance and early modern philosophy. A significant part of her research work is dedicated to the thought of early modern women writers and philosophers. Her latest publication is "Italian Women Philosophers in the Sixteenth Century" in *The Routledge Handbook of Women and Early Modern European Philosophy* (London, 2022).

*Kuni Sakamoto*

(PhD 2012) is associate professor at the School of Arts and Letters, Meiji University (Japan). The main focus of his research is on early modern Aristotelianism and Cartesianism. His works include *Julius Caesar Scaliger, Renaissance Reformer of Aristotelianism: A Study of His Exotericae exercitationes* (Leiden, 2016).

*Jole Shackelford*

(PhD 1989) is associate professor in the History of Medicine at the University of Minnesota. His research interests fall within the history of science and medicine in the European Renaissance and early modern periods, with an emerging fascination for the history of biological rhythms research, coming to light in his forthcoming trilogy *An Introduction to the History of Chronobiology* (University of Pittsburgh, 2022).

*Leen Spruit*

is professor of Early Modern Intellectual History at Radboud University, Nijmegen (The Netherlands). His research interests regard history of cognitive psychology, censorship of science and natural philosophy, and the reception of atomism in early modern Italy. His last published book is *Raimondo di Sangro. Cronaca di vita e opere* (with F. Masucci, Naples, 2020).
